

PRODUCT OWNER

Loudly GmbH is looking for an experienced Product Owner to join our agile and remote teams. We are the company behind Music Maker JAM, the #1 music creation app!

YOUR ROLE

If you want to create amazing user experiences for millions of creators around the world, then this is the right job for you.

You will work closely with a highly competent team in an agile and remote environment to design and build a highly unique production music service with a crossover to music customization and artificial intelligence.

Your role is to lead a team of web and mobile developers & collaborate with UX & Creative to grow the success of a yet unreleased music licensing service for the demanding creator market. You develop ideas & prototypes, maintain a strong vision and execute with a team of professionals.

Apply now, if you love music and like to build an entertainment product in a responsible role!

REQUIRED SKILLS

We assume that you have several years of relevant professional experience as a producer for apps. You are familiar with agile and have a track record of at least two released apps that you worked on from start to finish.

- Creation of a product vision and maintain it through different phases
- Identify opportunities, analytical decision making and effective problem solving
- Utilize data sources to derive insights from data analyses to support your hypothesis
- Lead a cross-functional team of engineers and designers to reach team goals
- Organize & moderate agile meetings like plannings, refinements, reviews and retros
- Versed in common agile tools and frameworks like Jira and Confluence
- Own the execution for writing specs, collaborating with stakeholders, managing project execution, drafting roadmaps and defining feature roll-out strategies

YOUR PROFILE

- 2-4 years of experience in product management
- Direct experience in building apps, from feature definition to deployment
- Knowledge of mobile marketing, re-engagement strategies
- Ability to formulate clear hypotheses and derive actionable insights from data
- Experienced in working in agile environments like Scrum or Kanban
- A storyteller, communicate concepts and ideas to stakeholders, including oral and written presentations, proposals, specifications and reports

WE OFFER

- A friendly & transparent company culture with highly motivated colleagues
- An exciting and responsible role with great impact
- International workplace environment, creative atmosphere & results driven
